

UI / UX Design with AI

Duration : **07 Months**

Course Fee : **₹30000**

Registration Fee: **₹300**

The **UI/UX** Design with AI Course helps learners build modern digital design skills using user research, interface design, and **AI-powered** tools. With practical projects and portfolio development, students gain real experience and prepare for careers in product design, startups, tech companies, and freelance **UI/UX** roles.

Course Structure

Month 1 – Design Fundamentals & UI Basics

Module 1: Introduction to UI/UX

- What is UI Design
- What is UX Design
- Difference between UI & UX
- Design Process
- User-Centered Design

Module 2: Design Fundamentals

- Color Theory
- Typography
- Layout Principles
- White Space
- Visual Hierarchy
- Alignment & Spacing

Module 3: Canva for Quick Design

- Social Media Design
- Posters
- Thumbnails
- Portfolio Pages
- Branding Basics

Practical

- Design Instagram Post
- Create Modern Poster
- Create Personal Portfolio Banner

Month 2 – Figma Complete UI Design

Module 4: Figma Basics

- Interface
- Frames
- Shapes
- Text Tools
- Components

Module 5: Wireframing

- Low Fidelity Wireframe
- Mobile App Planning
- User Flow

Module 6: UI Design

- Mobile App Design
- Website Design
- Dashboard Design
- Responsive Design

Module 7: Prototyping

- Clickable Prototype
- Animations
- Smart Interactions

Practical Projects

- Food Delivery App
- E-commerce Website
- Login & Signup Screens

Month 3 – Photoshop + AI Tools

Module 8: Photoshop Essentials

- Layers
- Background Remove
- Banner Design
- UI Mockups
- Image Editing

Module 9: AI Tools for Designers

- ChatGPT for UX Writing
- Midjourney basics
- AI Prompt Writing
- AI UI Ideas
- AI Moodboards

Module 10: UI Assets

- Buttons
- Icons
- Cards
- App Banners
- Hero Sections

Practical

- App Landing Page
- AI Generated UI Concept

Month 4 – UX Design & Real Projects

Module 11: UX Research

- User Persona
- User Journey
- Competitor Analysis
- UX Audit

Module 12: UX Process

- Empathy Mapping
- Problem Solving
- Usability Basics
- Accessibility Basics

Module 13: Real Projects

- SaaS Dashboard

- Travel App
- Fitness App

Practical

- Redesign Existing App
- UX Case Study

Page | 2

Month 5 – Freelancing & Career Preparation

Module 14: Portfolio Building

- Behance Portfolio
- Case Study Writing
- Project Presentation

Module 15: Freelancing

- Fiverr Basics
- Upwork Basics
- Client Communication
- Pricing Projects

Module 16: Career Preparation

- Resume Design
- LinkedIn Optimization
- Interview Questions
- Mock Interview

Final Projects

- 4–5 Portfolio Projects
- Complete App Design
- Website UI Project

Software Included

Main Software

- Figma
- Adobe Photoshop
- Canva

AI Tools

- ChatGPT
- Midjourney

UI / UX Design with AI

Cortex Skills Institute

Software Covered

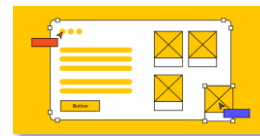

UI/UX Design Tools

- Figma
- Adobe Photoshop
- Canva
- Adobe Illustrator

AI & Productivity Tools

- ChatGPT
- Midjourney

Skills Covered

- Wireframing
- UI Design
- UX Research
- Prototyping
- Responsive Design
- AI-Assisted Design
- Portfolio Development
- Freelancing Basics

What is UI/UX Design?

UX Design (User Experience)

UX means how a user **feels** while using a website, app, or software.

A UX designer focuses on:

- Easy navigation
- User satisfaction
- Problem solving
- Research & planning
- Smooth user journey

Example:

If a food delivery app is easy to use and fast, that's good UX.

UI Design (User Interface)

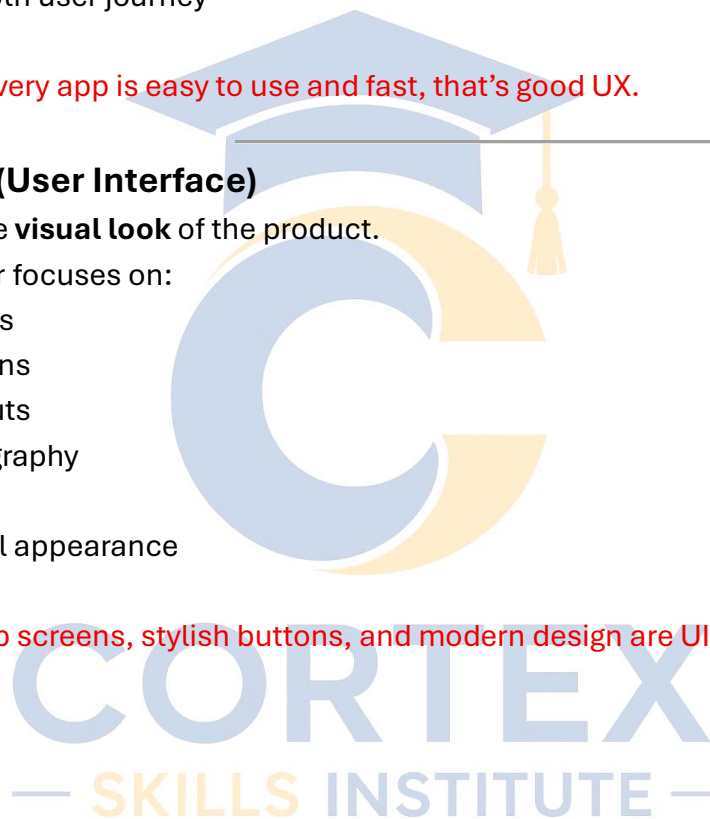

UI means the **visual look** of the product.

A UI designer focuses on:

- Colors
- Buttons
- Layouts
- Typography
- Icons
- Visual appearance

Example:

Beautiful app screens, stylish buttons, and modern design are UI.

Advanced UI/UX Design with AI Master Program

Master Figma, Photoshop, Illustrator, AI Tools, UX Research, Design Systems, SaaS

Product Design, Analytics, Webflow, Framer & Real Product Workflow.

Build Industry-Level Portfolio Projects and Become Job & Freelancing Ready.
